Day 2 – Eyre Peninsula

An early start this morning, depart for beautiful Coffin Bay. This area is of outstanding beauty, sapphire waters, world famous oysters and is home to a variety of important species of flora and fauna. There are no other comparable systems of bays and inlets in such compact form anywhere on the coast, which is why this area is classified as a maritime wilderness area. This morning's experience is something that will embed itself firmly into your memory for years to come. Local Nauo Aboriginal, Jody Miller and a Wirangu tribe member, are outstanding individuals looking to preserve their traditional stories, values and cultures by sharing the knowledge of their traditions from the soul. Be completely absorbed as you learn about their fascinating Indigenous culture through hands-on activities such as collecting and foraging for bush-tucker, understanding the amazing diversity of the bush medicine to be found, listening to their captivating story-telling and ancient history as you interact with your hosts to truly form an understanding of the local culture, community and history of this area, well before white man came along. You may even have the opportunity to experience some traditional methods of bush cooking and of course, tasting is a must. As seafood is a major part of this region, we tempt you with another lunch of fresh seafood platters at Coffin Bay 1802 Oyster Bar & Restaurant (or similar) overlooking the pristine waters and oyster leases that have made the town, and it's world famous oysters. This afternoon, we excite you with a cruise where you will be joining a local oyster farmer and cruising out to 'The Brothers' islands to observe the seabirds, seals and dolphins that call this area home.

Whilst cruising, learn about the humble oyster, the process of farming these oysters, shuck your own oysters and of course, oyster tasting – the freshest oysters you have ever tasted! Your expert oyster farmer will explain how and what they are doing to keep their industry sustainable for years to come and how they are lessening the impact on the environment. The larger island of 'The Brothers' in the Mount Dutton Bay Conservation Park, is of paleontological significance because of the presence of sub-fossil bones of six species, including an extinct kangaroo and a giant flightless bird. Elegant bottle-nosed dolphins are common within the turquoise Coffin Bay waterways, and common dolphins are frequently seen in offshore waters. Please note the cruise is weather dependent. This evening, return to your hotel to freshen up, before a five minute stroll to El Giorno's for a tasting menu. Savour a mixture of local fresh seafood and land products that of course are all locally produced.
